Venue	Maharaja Institute of Technology Mysore Campus; Hackathon guidelines specify Samalochana Hall
Participation	Nominated Top 3 Teams from Each Institution
Eligibility	Final-year students ,B.E, B.Tech & M.Tech,
Team Size	3-4 members in the hackathon guidelines; invitation documents specify 4 members
Judging	Internal and External Evaluators

3. Purpose of the Hackathon

- Provide students with an opportunity to develop innovative solutions to real-world problems.
- Allow participants to demonstrate technical, problem-solving, innovation, and communication skills.
- Expose students to industry practices, mentors, recruiters, and potential employers.
- Create opportunities for internships, mentorship, industry projects, and career growth.
- Help organizations and industry professionals engage with high-potential student talent through practical problem-solving.

4. Participation & Eligibility

- Participation is limited to the nominated Top 3 teams from each institution.
- The official hackathon guidelines state that each team consists of 3-4 final-year students.

- The invitation documents describe participation in teams of 4 members.
- Eligibility covers final-year students ,B.E., B.Tech, M.Tech,
- Only officially nominated and registered team members may participate.
- All team members are expected to contribute actively to the project.

5. Problem Statements & Project Expectations

- Teams work on an approved or assigned real-world problem statement.
- Solutions should demonstrate innovation, practicality, technical feasibility, and potential impact.
- Teams are expected to develop a working prototype or MVP wherever applicable.
- Projects must represent the team's original work.
- External resources used in the project should be appropriately acknowledged.

6. Evaluation Criteria

1. Understanding of the Problem Statement

2. Innovation and Creativity

3. Technical Feasibility

4. Implementation and Functionality

5. Practical Impact and Scalability

6. Presentation and Communication

7. Industry Exposure & Career Opportunities

- Outstanding teams may get opportunities to interact with industry experts and participating organizations.
- Students may be considered for internships, mentorship, industry projects, and career opportunities based on performance and eligibility.
- The invitation documents highlight interaction with recruiters and industry mentors, as well as potential placement and pre-placement interview opportunities.
- Any internship, placement, mentorship, or related opportunity is subject to the respective organization's selection process and eligibility criteria.

8. Industry & Hiring Partner Engagement

The event communication positions Hack for Hire as a bridge between industry challenges and student innovation. Startups and companies can be invited to associate as Industry and Hiring Partners by

bringing forward real-world problems, technical challenges, or business requirements that can be explored by student teams. This creates an opportunity for organizations to observe practical problem-solving and identify promising technical talent.

9. Event Highlights

- Real-world industry problem statements and challenges
- Mentorship and guidance from experienced industry professionals
- Interaction with recruiters and industry experts
- Networking opportunities with industry professionals
- Potential internships, mentorship, industry projects, and career opportunities
- Potential placement / pre-placement opportunities for eligible high-performing students
- Certificates for participants

10. General Guidelines

- Participants must maintain professional conduct and discipline throughout the event.
- Teams must follow the schedule, submission requirements, and instructions issued by the organizing committee.
- Plagiarized work or unfair practices may result in disqualification.
- The decision of the Evaluation Panel and Organizing Committee shall be final.

13. Important Note on Source Details

The uploaded documents contain a few differences in wording: the hackathon guideline states a team size of 3–4 members and names Samalochana Hall as the venue, while the invitation letters state teams of 4 members and refer to the MITM campus as the venue. This document preserves both source statements rather than silently changing them. The organizing committee should confirm the final team-size and venue wording before external circulation.
